Ozone water intervention

The Eco-Safe MD-2000 Dual by Eco-Safe Systems USA, Inc. is an ozone water intervention system designed to attack a wide range of contaminants, including *Salmonella*, *Listeria* and *E. coli*. Eco-Safe systems eliminate the use of harsh chemicals like chlorine, pesticides and bactericides, and ozonated water is environmentally friendly because it disappears after 20 to 30 minutes of use. Eco-Safe's ozone water intervention systems are compliant with F.D.A., U.S.D.A. and HACCP guidelines, and the company has received certification from the National Sanitation Foundation. Foods produced using ozone also comply with organic standards. For more information, call (800) 649-1434.
