

WASHER

Eco-Safe has introduced the Eco-Jet Ozone Power Washer. The washer allows faster cleanup and disinfection for the food industry while reducing the need for toxic chemicals. As the most powerful bactericide

known, ozonated water cleans 3,100 times faster and is up to 50 times more effective than chlorinated water. It can disinfect a wide range of contaminants, including *Salmonella*, *Listeria*, *Shigella* and *E. coli* and enables processors to sanitize without the need for hot water.
